WEB FONT COMMERCIAL LICENSE

EarthLaunch Font License —

Typeface: Turificus Stone & Dingbats

Licensor: EarthLaunch Technologies LLC / Ruffled Pages

Effective Date: Date of Purchase

This is a license to use the web font. You do not own the copyright.

1. Who this is for:

One purchaser (an individual or a single business entity), for websites that purchaser owns or operates.

This license covers up to 3 domains and up to 250,000 page views per month across those domains combined.

Building a site for a client? Buy one license per client, in the client's name. If you need more domains or more traffic, buy another license or message us for an extended license.

2. You may:

- Embed the web font files (WOFF2) in websites with CSS @font-face, hosted on your own server or your own content delivery network.
- Use the font on commercial websites: business sites, online shops, portfolios, landing pages, blogs with ads or sponsorships, and client sites covered by this license.
- Use the font and the dingbats for any text on those pages: headings, body text, menus, buttons, prices and decoration.
- Keep using the font on staging and development copies of your covered websites. These do not count toward your domain limit.

3. You may not:

- Offer the font files for download, link to them for download, or send them to anyone, including a client.
- Install the web font files on a computer for desktop use. Desktop use needs the Commercial License.
- Let other websites use or hotlink your copy of the files, or upload them to a public font service.
- Use the web fonts in mobile or desktop apps, games, e-books, HTML email, ads served on other people's websites, or tools that generate images or documents on a server, without an extended license.
- Put the font files inside a product for sale: website themes, templates, page-builder kits or plugins.
- Go over the domains or monthly page views this license covers.

- Convert, rename or modify the font and publish it as a new typeface, or remove the copyright and license information inside the font files.

Putting the letters on your website is fine. Passing on the font itself is not.

4. What the terms mean:

- **One business:** one legal entity. A freelancer and their own shop count as one. A second LLC or a separate client company needs another license.
- **Domain:** one web address and its subdomains. example.com, shop.example.com and blog.example.com count as one domain; example.co.uk counts as another.
- **Page view:** one web page loaded in a browser that uses the font. If your sites go over 250,000 page views a month for three months in a row, message us to upgrade.

5. Protecting the files

Take reasonable steps so the font files are served only to your own pages. For example, limit access to your own domains (cross-origin settings) and keep the files out of folders that visitors can browse or list.

6. Delivery

You receive the web font files listed on the product page. Files are provided as-is.

7. Refunds

Digital files are delivered immediately. All sales are final except for corrupt or incomplete files, which we will replace.

8. Termination

This license ends if you break it. You must remove the font from all websites and delete the files. We may pursue misuse of the files.

9. Disclaimer

The font is provided without warranty. EarthLaunch is not liable for lost work, failed installs, website or browser display issues, or indirect damages beyond the amount you paid for this license.

Need more domains, higher traffic, app or email use, or desktop use? Message us before you publish.
